

FRENCH SAND USED IN U. S.

(N. E. A. Special.)

A French Port, Nov. 9.—The United States has all the sand it needs, more than it can ever use. Nevertheless hundreds of thousands of tons are being used in building construction in America.

Here's the answer to the riddle: Ships laden with men, munitions and material for the war against the Hun have to return to America "light," that is to say without cargoes.

If the ships didn't have either cargo or ballast they'd blow and flop around in the ocean like a toy balloon in a bath tub.

So at this port is a man named Captain A. T. Huggins, an old sailing master from Brooklyn, N. Y., whose job it is—with the aid of a battalion of men—to provide ballast and coal for the transports and the cargo ships returning to America.

They have to supply as much as 2000 tons of sand as ballast for some ships, and of several thousand tons of coal, according to the size of the ship—the Leviathan, one time Vaterland, burns 4000 tons a day.

So the stevedore regiment, recruited from everywhere, from every sort of calling, frequently is called upon when one of the speedy, large ships arrives, to unload 4000 tons of freight—while unnumbered thousands of troops disembark—and then load the ship with 3,000 to 5,000 tons of coal, and the necessary sand. And all within 58 hours.

AVOID "FLU," AND PNEUMONIA BY STERILIZING NOSE

London Epidemic of 1891 Proved
Oil Eucalypti (Eucapine Salve)
Is Most Effective Preventive
Known.

Get out your jar of Eucapine Salve, or, if you have none, go to the nearest drug store at once and get a family jar of this well-known nose and throat sterilizer. Sterilize morning and night by sniffing the Eucapine up into the nostrils and back into the throat, whence it will spread to the larynx and trachea thus sterilizing the nose and throat.

The chief ingredients of Eucapine Salve is eucalypti, the non-poisonous balsamic whose power to prevent influenza was first discovered in the London epidemic of 1891. In addition, Eucapine salve contains just enough camphor, menthol and oil of white pine to make it soothing, healing and delightful to use. Even the babies enjoy it. Ask any well informed physician and he will tell you that Eucapine, though originally designed for the mother's use with her children in colds, croup and to prevent pneumonia, is the best and most agreeable antiseptic you can use to sterilize the nose and throat of young and old alike. Note: One application of the product referred to above sterilizes the air passages for about twelve hours against diseases contracted through the nose and throat. Any druggist can supply you for half a dollar.—Adv.

HIGH SCHOOL NOTES

By SIG SOLOMON.

"Open wide the portals! Enter all!" After a month "overtime" vacation, due to the "flu," P. H. S. threw open her doors last Monday to an impatient student body, numbering 373. This is a record-breaking attendance for the High, and proves that much greater importance is attached to a high school education than was formerly the case. In fact, we can recall, only a few years ago, when the Junior class consisted of but one member, and there was no Senior in existence. Look at us today—the Senior class boasting of 73 members, and the Juniors having a much larger class. Truly the value of a high school education is rapidly being recognized in Pensacola.

The last term of P. H. S. was the most successful all around year we have ever experienced. Under the leadership of Professor Rogers, and with the hearty co-operation of the faculty, such improvements as student government, debates with outside schools and first-class dramatic productions were begun. Athletics, The Tattler and every other undertaking was carried to a successful conclusion.

This year, under the leadership of Professor Collier and with the hearty co-operation of the faculty assured we hope to make this year even more successful than last year. All the improvements instituted last year will be continued, and various others will be tried out, chief among which will be military training. Professor Collier is especially interested in debating, and many changes for the better are being planned in this line of work. The football season is well under way. The Tatt officers have been elected and almost all the remainder of the organizations have begun to organize.

Military Training.

At last military training has been instituted in P. H. S. This is an improvement the pupils and faculty have been working hard to institute for some time. This year, the training will be for both boys and girls, but will not be compulsory. (We hope to see it so by next year.)

For equipment the boys have decided on the regulation khaki U. S. army uniform and leggings with caps and insignia to denote us from the regular army. Shoes will not necessarily be regulation. Dummy rifles will be used to begin with but as the U. S. is considering providing rifles to the High School Volunteer Corps over the country, we hope to possess the real article in the near future.

Practically the whole school is behind this movement. The boys, under the leadership of Prof. Tyler, fresh from military training at Plattsburg, assisted by McHenry Jones and John Goring, who spent the summer in military training schools, have already learned the rudiments of drill. The officers of the corps will be announced at an early date.

The girls, under Miss Beth Walton, who has not been able to attend school on account of sickness, will begin training as soon as Miss Walton is able to teach them, which, we hope, will be very soon.

Boys' Athletics.

The Boys' Athletic association, of which every boy is a compulsory member, held its first meeting about two weeks ago. Officers were elected, and arrangements were made for the football season and several important matters were disposed of. Since the meeting, football practices have been held regularly at Maxent Park and rivalry for the teams is intense. There will be two school teams, and the second team, as well as the first, will have opportunities to play outside teams. Louis Creary is captain of the team and Julian Olsen, of the Y. M. C. A., coach. Although handicapped by the fact that many of the larger boys have gone to military training schools, Coach Olsen says that we have good material out for practice, and with hard work, the team will be a winner.

The game with Palmer was postponed by her, on account of the "flu" and various other reasons, but other dates have been arranged with her, as well as with Mobile High and other schools. The game with Pal-

mer the Y. M. C. A. and High on Saturday at Maxent Park, and this partly alleviated the disappointment caused by the postponement of the game with Palmer.

Girls' Athletics.

(By A. B.)

The Girls' Athletic association, of which every girl is a member, held its first meeting Tuesday. At this meeting several matters concerning the work for the ensuing year were attended to, the most important of which was the election of officers. Also arrangements were made for the basketball season, and practices will begin soon. Officers were elected as follows:

President, Gladys Vaughn.
Vice-President, Miriam Olsen.
Secretary-Treasurer, Adele Berlin.
Business Manager, Ida Mervelther.
Reporter, Aetha Borghevin.
Cheer Leader, Lois McLellan.

Notations.

The faculty, as well as the student body, is the largest in the experience of P. H. S. The faculty includes sixteen members, as follows: Prof. Collier, principal; Prof. Tyler, assistant; Misses Suter, Carter, Waite, Calloway, Day, McMillan, Nobles, Moffett, Johnson, Walton, Schouten; Mrs. Schornherst, Mrs. Gillis and Mrs. Benn.

Our service flag will have to be greatly enlarged, as very many more of our boys have enlisted in the service since last year.

There was a great commotion in the study hall Thursday when it was announced that Germany had surrendered. The school rang with yells and patriotic songs, and Prof. Collier, realizing that books were useless for the remainder of the day, dismissed school for the day. Alas, 'twas a fake.

Prof. Collier has tried the plan of allowing students to take charge of the study hall during the chapel period.

Watch P. H. S. during the United War Work campaign!

One thing that has been conspicuous in its absence during chapel is music. Where, oh where, is our Victrola?

Prof. Collier has promised not to make many lengthy speeches before the student body. This announcement was hailed with delight or if there is one thing we hate above all others, it is lengthy speeches with no intermissions.

We want to express our gratitude to the citizens for passing the 10-mill apportionment.

These notes are the initial effort of the Press Club this year.

Senior.

(By M. B.)

The Senior class has begun with 73 members, the largest Senior class yet at the P. H. S. As it is the largest, the members are going to make it the best and live up to our motto, "First in Everything." To aid them in this, the following officers have been elected:

President, Craigbill Brown.
Secretary-Treasurer, Ruth Pfeiffer.
Reporter, Margrethe Borghevin.
(The reason more is not written is because we boast after, not before the event.)

Junior.

(By R. O'H.)

Hurrah for the Juniors! Was there ever a more enthusiastic class in P. H. S. They have started out to make this a banner year in all that they undertake. Miriam Olsen is president; Elizabeth Edwards, vice-president; Ben Robinson, secretary-treasurer; and Ruth O'Hara, reporter. These officers have the co-operation of the whole class and intend to do all in their power to make the class a better class and the school a better school.

Sophomore.

(By K. L. W.)

Rip, Zip, Rip, Zip, Rip, Zip, Ray! How about Sophomores? They're O. K.

Well, here we are as Sophomores, after a long vacation, full of eagerness and enthusiasm, and ready for good, hard work. The "flu" didn't get a bit of our pep, and we are in for lessons, basketball, football, war work and almost anything that Sophs like.

We have an enrollment of 83, a big class, surely, but the more the better. You have heard many things about us last year, but you will hear a great many more soon, and we hope the better you know us the better you'll like us.

The only officers we have who have returned to school are Vice-President James Mervin and Secretary-Treasurer Mary Lee Mathews.

Freshmen.

(By L. S.)

"Nothing will come of nothing." We Freshies intend to profit by this maxim and make even the almighty senior sit up and take notice of us during the coming year. Just wait until we get settled, and then you won't hear any slighting remarks about "those Freshies."

We have not elected officers yet, but you can trust to our judgment that they will be good when we do get them.

We are the largest class of P. H. S. in numbers and enthusiasm as you will soon see by the records we intend to make. Watch our smoke in the United War Work campaign.

13 MEN ARE CALLED BY PETERSON FOR MERCHANT MARINE

A call for more men to serve in the merchant marine has been received by E. W. Peterson, enrolling agent at Pensacola. The men are to be sent to Norfolk, Va., for training. Those who have been called are:

Otto Bert Pfeiffer, 210 W. Government street; Arthur W. Anderson, 614 W. Janaqua; Julius Raymond Prather, 1312 E. Strong; William Leslie Underwood, 400 N. Hayne; Dewey Calvin, 114 S. Barcelona; Manuel Ralph Gomez, 230 W. Zarragossa; Henry Theodore Lens, Warrington; John Clay Smith, Jr., 819 N. Davis; James Ira Grice, Pensacola; Samuel Riall Riddle, 500 N. Hayne; Walter Norman Lovering, Alcanex & Zarragossa; Leonard Morgan Carr; R. D. Box No. 291, Pensacola; John Henry Mayne, R. D. Pensacola.

They are to report for physical examination at once.

OFFICIAL LIST OF CASUALTIES IN AMERICAN ARMIES ABROAD

The following casualties are reported by the commanding general of the American Expeditionary Forces:

KILLED IN ACTION.

Captains.
H. H. Chapman, Patchogue, N. Y.; H. N. Peters, Sabinal, Tex.; B. F. Dixon, Gastonia, N. C.

Lieutenants.

Millions Use It For Colds

Because "Pape's Cold Compound" relieves cold or gripe misery in a few hours—Really wonderful!

Don't stay stuffed up!

Quit blowing and snuffling! A dose of "Pape's Cold Compound" taken every two hours until three doses are taken will end gripe misery and break up a severe cold either in the head, chest, body or limbs.

It promptly opens clogged-up nostrils and air passages; stops nasty discharge or nose running; relieves

sick headache, dullness, feverishness, sore throat, sneezing, soreness and stiffness.

"Pape's Cold Compound" is the quickest, surest relief known and costs only a few cents at drug stores. It acts without assistance, tastes nice, and causes no inconvenience. Don't accept a substitute. Insist on "Pape's"—nothing else.—Adv.

Beaufont Winner At the Club

Last night I went into the "used-to-be-bar" and asked the waiter for the best drink he could serve me—reached for the brass rail while waiting for him to get it but it wasn't there. However the coldest bottle I've seen in a long time was set down in front of me and say friend, the amber fluid that flowed from that bottle was the finest I've ever tasted—all the snap and zest that any man could want with a little more added. Of course you have already guessed what the name of that drink was—BEAUFONT.

Beaufont every time is my newest resolution but it's not going to be the usual kind I make every new year. "Beaufont Ginger Ale is real Ginger Ale."

Yours truly,

Jack Wise
